

Benefits of Solar Energy

- 1) Drastically reduce your electric bills
- 2) Earn a great return on your investment
- 3) Protect against rising energy costs
- 4) Increase your property value
- 5) Protect the environment

Testimonials

"I would like to congratulate Maoneng Philippines because even if there are a few delays due to the construction of the building, you still delivered in a timely manner. And the way the engineers and installers worked on the installation of the panels and inverters was very professional."

Mr. Richard Caratol
CEO of Philippine Solar Investment Corporation

"We are grateful to God to have achieved what we've always wanted. If the company Maoneng PH is willing to put all the expense and the entire cost of the project without any advance payment from us then it must be one of the quality of the product that it is offering."

Mr. Jay Antonio Luyano, Sr.
President of Maoneng PH
